

BioCV Javier de las Rivas :

MSc in Biology and PhD in Biochemistry and Molecular Biology by the University of the Basque Country (1990). From 1990 to 1993 Post-Doctoral Researcher at the Imperial College of Science, Technology and Medicine (London, UK). From 1993 to 1998 Associate Professor in the Department of Biochemistry and Molecular Biology of the University of the Basque Country at the Faculty of Pharmacy and Faculty of Science, teaching: Biochemistry, Biomolecules and Metabolism Regulation. In 1998 gained a position as "Científico Titular" in the Spanish Research Council (CSIC-Spain) and in 2006 he became "Investigador Científico" of the same Institution CSIC. His initial research as experimental biochemist focused on biochemical studies on protein structure and function, mainly on redox proteins. Since 1998, he works in the new field of Bioinformatics and Systems Biology, with two stays for specialization in 1998 in the EMBL (Heidelberg, Germany) and in 2000-2001 in the Mount Sinai School of Medicine (New York, USA). Since 2002 he is staff scientist and group leader (PI) in the Cancer Research Center (CiC-IBMCC, Salamanca, Spain) that belongs to the University of Salamanca (USAL) and to the CSIC, working in the field of Bioinformatics, Computational Biology and Functional Genomics with main application to cancer and cancer genomics data
